

Subrogation and Contribution / Reimbursement Summary

Simulated training document only — not an official or live claim file.

Subrogation / Recovery Analysis

| | |
|----------------------------------|---|
| Potential for Subrogation | Yes – but minimal. |
| Incident Context | Injury occurred on employer's internal stairwell during interaction with a resident. No motor vehicle involvement or outside third-party premises owner. |
| Vendor Involvement | Facility uses BrightPath Janitorial Services for some evening floor maintenance, but housekeeping logs for the date of injury show the stairwell was mopped by in-house staff and documented as dry with no concerns. |
| Subrogation Unit Review | Subrogation unit review dated 11/30/2024 concluded that the fall mechanism was related to resident behavior rather than a premises defect or vendor negligence. Recommendation: no active subrogation pursuit absent new evidence. |

Contribution / Reimbursement Analysis

| | |
|-----------------------------------|---|
| Prior Industrial Claims | 2018 lumbar claim with a different employer (Sunrise House) was fully resolved by Stipulated Award and later C&R of future medical. Coverage there does not overlap with the current specific 2024 date of injury. |
| Inter-Carrier Contribution | No overlapping coverage periods or concurrent injuries that would justify contribution or reimbursement from a prior carrier. Apportionment of disability to prior injury is handled at the med-legal/PD rating level rather than through contribution. |
| Contribution Status | No contribution/reimbursement potential identified. Status remains "None" unless new coverage information emerges. |
